FOREST TROUSERS 3.0

Forest Trousers are durable all-weather trousers developed for outdoor work in forests and nature with varying activity, temperature, and climate. They are suitable to be worn in autumn, winter, and spring as an outer layer, with their wind and waterproof properties and high breathability. The outer material is a lightweight and durable Cordura polyamide, and inside hangs a loose Gore-Tex Micro Grid Liner. The air gap that forms between the liner and the outer fabric facilitates vapor transport even in extreme cold down to -50°C, helping the user stay dry. The trousers have several practical features such as: detachable suspenders, reinforced knees with knee pad pockets and padded protection, spacious leg pockets for equipment, and side pockets with ventilation mesh. On the outside of the leg, from foot to knee, there is a zip opening with a gusset and at the leg opening an adjustable strap and hook to attach to the shoe.

FUNCTIONS

- Pre-shaped knees
- Padded Cordura-reinforced knees with Velcro-fitted knee protection pockets to protect against hard and cold surfaces
- 2-point braces
- Zipped side pockets with mesh inner to help improve cooling and breathability.
- Waistband is higher at back to protect against cold
- Large zipped leg pockets with Velcro closure on flaps
- Wind-resistant panel under zips on legs
- Strap at ends of legs for adjusting width
- Hook for attaching ends of legs to shoes
- Cordura-reinforced leg ends.
- Windproof
- Waterproof
- Great breathability
