

RF 60 TROUSERS

The RF60 Trousers are one of the latest reinforcement products in our range. They are designed to be used as an insulating layer like our popular Thule trousers. This model uses the same full length zips that make the trousers quick and easy to put on and off. The RF60 Trousers has a slight edge in terms of the ability to reduce weight and volume, combined with low moisture retention and fast drying time.

FUNCTIONS

- Very low moisture retention
- Quick-drying
- Elasticated waist
- Divided waist
- Full length zip on the outside of both legs for quick removal and putting on
- UV/ VIS/ IRR
