

RAC TROUSERS

RAC Trousers are, like the jacket, an enhanced version of the 3 L GORE-TEX trousers CRW Trousers. It is developed in collaboration with one of our customers in the military market. In comparison with CRW Trousers, the RAC Trousers have reinforcements at the leg ends, on the knees and on the buttocks to minimise wear. The model is developed for both vehicle drivers and field workers and has a spacious pocket on the left thigh to store maps in.

FUNCTIONS

- Fly
- Waist belt and elastic waist
- Reinforcement sections at the back knees and leg ends
