

# RF 150 REV TROUSERS

RF 150 Rev Trousers have been developed to complement our line of products with great consideration for weight and volume. It features thicker padding for use in lower temperature areas and winter environments, and one of the key strengths of the product is its almost nonexistent ability to absorb moisture, which gives it an extremely fast drying time. The product can be used as insulation in the sleeping system, together with the jacket.

## FUNCTIONS

- UV/VIS/IRR
- Reversible
- Reinforced knees and seat
- Split waist
- Full zipper on the outside of both legs for quick on and off
- Elastic waistband
- Pre-bent knees
- Extremely low moisture absorption
- Extremely short drying time
- The sizes are designed to be used over the CPA system, which is why we have made the trousers reversible.
